DARSHAN DOMADIYA

(249) 288-0981 | darshandomadiya2026@gmail.com | GitHub | Portfolio | LinkedIn

PROFESSIONAL SUMMARY

- Former Software Engineer Intern at Nokia and AWS certified professional with strong programming skills in Java, Python, TypeScript, JavaScript, React, and SQL. Experienced in REST APIs and SDK development, relational data modelling, data connectivity, cloud platforms, debugging and code reviews. Recent Master's graduate experienced in leveraging AI-native workflows to build and optimize code quality.

WORK EXPERIENCE

Software Engineer Intern (Co-op) Jan 2026 – Aug 2026
Nokia - Remote
Tech: React, JavaScript, TypeScript, Node.js, Git, Figma, Jenkins, JIRA, Cursor

- Improved React component rendering performance by **30%** through optimized hooks, memoization, and reduced unnecessary re-renders across shared TypeScript UI modules.
- Achieved a 98% system test success rate by resolving UI defects, validating component integrations, and supporting end-to-end testing within an Agile SDLC.
- Streamlined UI/UX debugging workflows with Cursor AI, reducing defect resolution time by **50%** while enhancing engineering productivity, software quality and reliability.
- Reduced application bundle size by **25%** through dependency cleanup, optimization, and removal of deprecated components and libraries during the NDS Connect migration.
- Migrated and validated 75+ React/TypeScript components to NDS Connect, achieving 100% migration accuracy while maintaining component functionality and design-system consistency.

Full Stack Developer Intern Jan 2024 – Jun 2024
Concetto Labs Pvt. Ltd. | Ahmedabad, India
Tech: React, Java, TypeScript, Node, Spring Boot, REST APIs, MongoDB, Postman

- Developed scalable frontend solutions for web applications using React and Redux to manage complex application states and optimize user interfaces.
- Designed, developed, and integrated REST APIs using Spring Boot and Node.js and resolved **70%** of post-production backend issues utilizing Postman, improving backend services reliability.

TECHNICAL SKILLS

- **Programming Languages:** Java, JavaScript, TypeScript, Python, C/C++
- **Frameworks:** React, Vue, Node.js, Express, Spring Boot, Angular, Redux, Django, GraphQL
- **Database & Tools:** SQL, PostgreSQL, MongoDB, Git, GitHub, AWS, Docker, Cursor, GitHub Copilot
- **Practices:** Data Structures, OOP, GenAI, AI-assisted Development, Version Control, CI/CD Pipelines

EDUCATION

Master of Applied Computing Jan 2025 – Aug 2026
University of Windsor | Windsor, ON | GPA: 86/100
Bachelor in Information Technology Jun 2020 – May 2024
Gujarat Technological University | Ahmedabad, India | GPA: 8.78/10

PROJECTS

- **Adaptive Dental Inventory Management System** (GitHub) Sep 2025 – Nov 2025
  Tech Stack: Java, Spring Boot, React, MySQL, REST APIs, Git, Microservices, Postman
  - Designed a React-based dashboard for dentists and staff to view stock levels, manage orders, and visualize usage trends through interactive UI components, enhancing front-end development.
  - Developed and integrated secure REST APIs in Java/Spring Boot for inventory CRUD operations and real-time synchronization across modules.

- **Distributed File System** (GitHub) Aug 2025 – Sep 2025
  Tech Stack: C, Socket Programming, Linux, WebSockets, System Calls
  - Developed a distributed system for file management with four servers (S1-S4), where clients interact only with S1 while files are routed to the appropriate server based on type (.c, .pdf, .txt, .zip).
  - Implemented commands for uploading, downloading, deleting, listing, and downloading tar archives of files, with seamless background transfers across servers.
- **C-Shell (Custom Shell Terminal)** (GitHub) Jun 2025 – Jul 2025
  Tech Stack: C, Linux, System Programming, File I/O, TCP/IP
  - Built a custom Unix-like shell with support for built-in commands, piping, redirection, and background job execution.
  - Implemented process forking, signal handling, and command parsing from scratch to deepen OS and systems programming skills.
- **BargainFox** (GitHub) Jan 2024 – Mar 2024
  Tech Stack: HTML5, CSS3, TypeScript, React, Node, ExpressJS, Redux, Postman
  - Built a fully API-integrated and responsive e-commerce platform with user authentication and key pages like product listing and checkout using ReactJS.
  - Participated in agile sprint planning and code reviews to enhance product quality and optimize feature implementation.

CERTIFICATIONS

- **Getting Started with Microsoft Azure by Microsoft Press** – LinkedIn Learning Jul 2025
- **UNIX Essential Training** – LinkedIn Learning May 2025
- **AWS Cloud Practitioner Essentials** – Amazon Web Services (Verify) Mar 2025
- **Selenium Essential Training** – LinkedIn Learning Jan 2025
